

IMEF

INDIGENOUS MINING EQUITY FOUNDATION

An Initiative by César de la Cruz

César de la
Cruz
Consulting

Researching and advocating “Impact Investing” and “Business Model” solutions to empower neglected indigenous communities living in mineral rich countries.

The Problematic

There is a mismatch between indigenous communities and mining wealth in the world. The negative impacts of mining are concentrated disproportionately on indigenous marginalized communities. The problematic exists in developing and developed nations.

Our Mission

To empower Indigenous communities in the mining sector and integrate them in the global commodity and capital markets sustainably.

Our Solution

“Indigenous Equity business model” and “impact investing” solutions through shared value partnerships with a mining prospector enterprise.

Prospect Projects Areas

Sweden, Haiti, Canada and Peru and more to come.

We offer local solutions with a global social and environmental impact. Our solutions have potential for social franchising and are versatile to be applied in other sectors.
